

99.9%

~~100%~~ of conferences have agendas.

Ours is an exception.  
Will you help?

Teachers of blind/low-vision students from across Louisiana are gathering to explore, discuss, and change the future of education.

We know that at every conference, you come in hoping to get the answer to one question or better understand one issue. At most meetings, if that issue isn't on the agenda, you'll leave thoroughly disappointed. At this conference, **we're hosting "un-conferencing" sessions** discussing the concerns, technology, and struggles that matter most to you.

### There are *a few* scheduled sessions...

students with  
**MULTIPLE**  
**disabilities**

learn from  
**tech**  
experts

one-on-one  
**cane travel**  
experiences

**sports**  
**& rec**  
activities

During the weekend, we guarantee that you'll be introduced to resources that you can use throughout this school year and for decades to come.

**September 20-22, 2013 • Ruston, Louisiana**
